

We connect producers and grocers

We advise and support producers on the international markets

We advise producers on the establishment and/or expansion of their export business and, if requested, help to implement international sales structures.

We support companies in the marketing of their products worldwide and identify with them. Our focus lies on high-quality, authentic food that represents real added value.

We support retailers in sourcing attractive products.

It is our goal to offer retailers „tailor-made“ solutions and to build partnerships between manufacturers and retailers.

For this purpose, we develop strategies together. We react quickly to the needs and requirements of the market and implement this efficiently through targeted planning, market-oriented price strategies and long-term cooperation with selected suppliers.
